Rippled Sands 1

D324S6461-225

Rippled Sands is a textured study of landscape imagery. The view provides a reflection of both line and shape derived from nature. A simple color scheme of alabaster white and pearl grey lends a sense of serenity. A Minimalistic feel is brought forward by the work's vertical positioning within the frame. The artist's deliberate use of negative space helps further the feeling of tranquil isolation in this exclusive piece for ART by TA.
