

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

- 1-2. Loosen the connecting hardware and open the globe cover.
- 3-4. Insert each lamp arm through the side holes of the globe, and secure with nuts and washers.
5. Connect the five black socket wires to the fixture main black wire, and the five white socket wires to the main white wire using wire connectors. Tuck all wires inside the globe.
- 6-7. Close the globe cover and tighten the connecting hardware securely.
- 8-10. Feed the main wires through the downrod, then screw the downrod onto the connecting hardware (multiple downrods can be connected for added length).
11. Pass the main wires through canopy assembly, and tighten the canopy onto the downrod.
12. Secure the mounting bracket to the junction box using screws.
13. Wiring Connections
 - Use wire connectors to connect the fixture's positive wire (L), negative wire (N) to the corresponding wires from the junction box. Connect the ground wires to the grounding terminal.
 - Ensure no exposed conductors remain outside wire connectors or outside the junction box.
- 14-15. Place the canopy over the mounting bracket and secure with the provided decorative nuts.
16. Screw the bottom decorative finial onto the base of the fixture.
17. Install bulb into socket (bulb not included).
18. Install the glass shades onto the socket adapters of each lamp arm.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
