

Assembly Instructions for **Model 210147259**

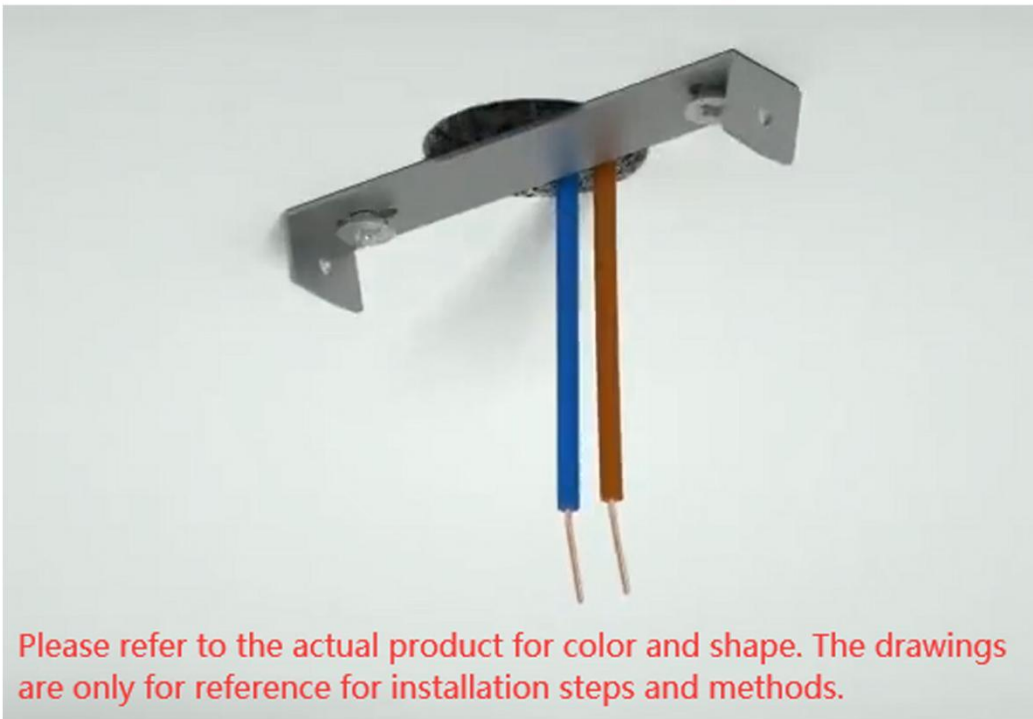

Assembly Method

In the following instructions, some pictures are for reference only.
Please install according to the provided method.

1. Drill holes in the ceiling and insert expansion bolts.

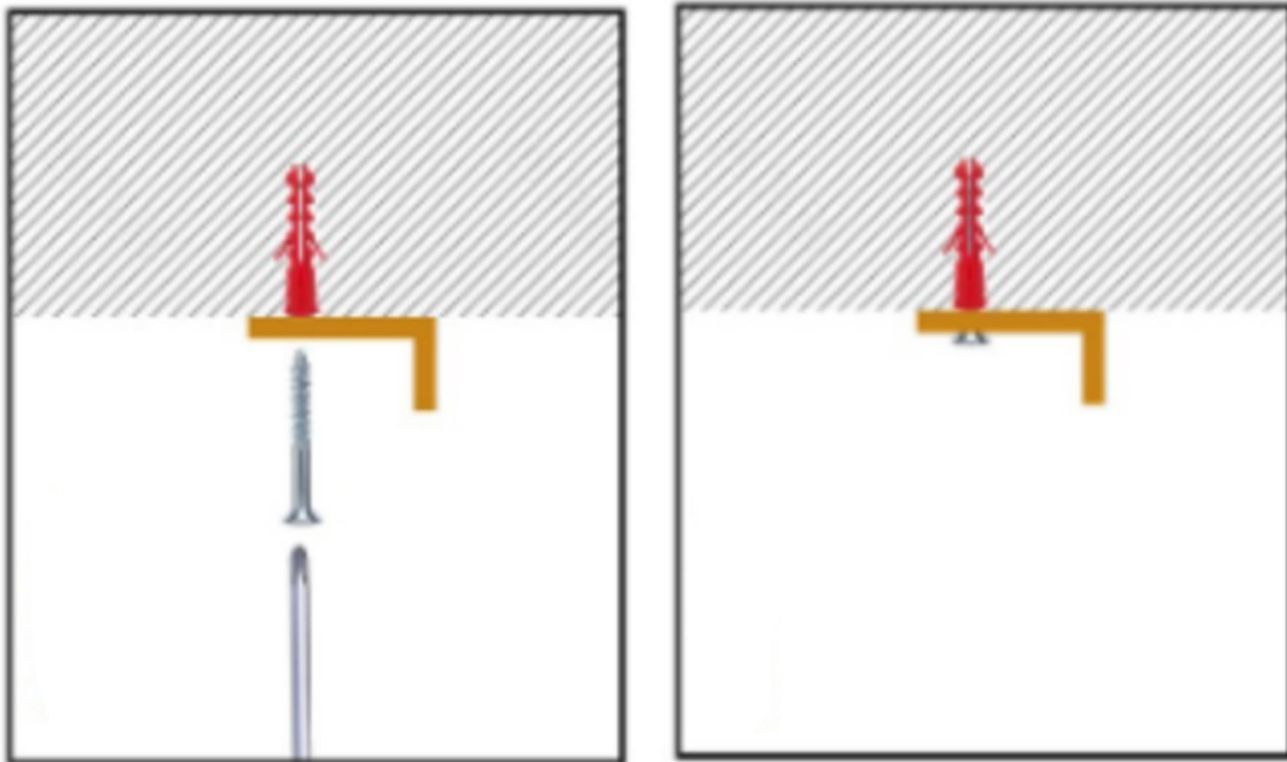

2. Position the mounting bracket next to the ceiling power cable.

Please refer to the actual product for color and shape. The drawings are only for reference for installation steps and methods.

3. Secure the mounting bracket using self-tapping screws.

4. Assemble the main body of the light fixture.

5. Connecting the fixture cables:

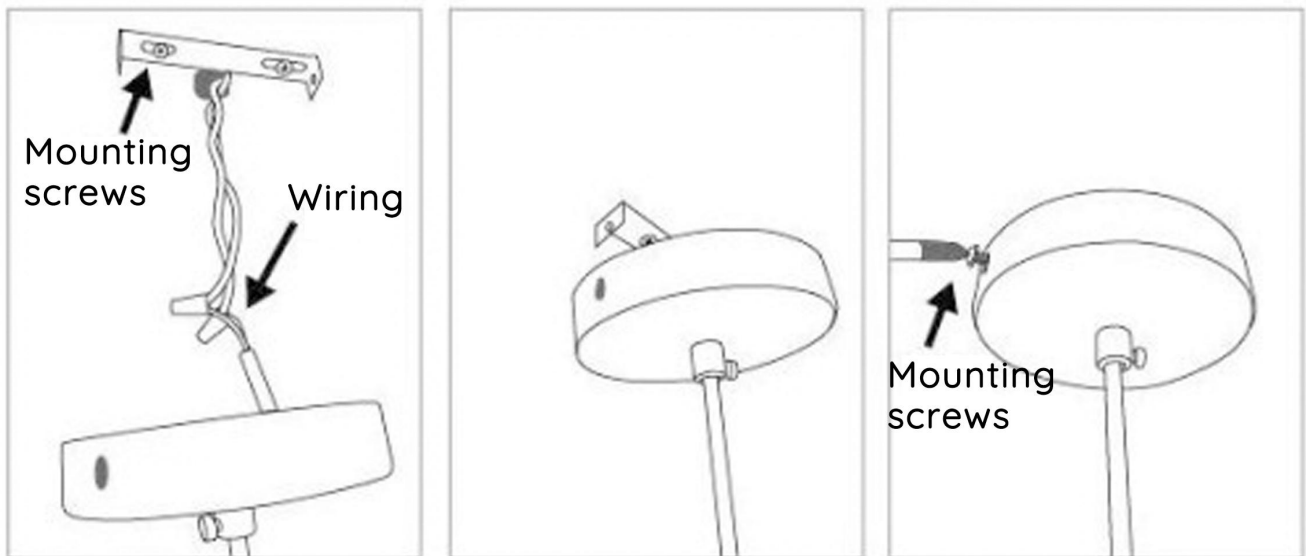

Connect the red and blue wires to the live and neutral power lines, respectively.

(It is not necessary to distinguish between live and neutral wires.)

Connect the gray and white wires from the driver to the light source.

(Some fixtures come with this connection pre-wired.)

6. Method for securing the ceiling canopy.

The installation is complete.

Your fixture is now assembled and ready to use.
