Specifications

Input Power	110V/60Hz
Power Consumption	35–45W
Recommended Room Sizes	350–550 sq. ft.

Parts Diagram

Instructions

1. Ensure the plug is fully inserted before use.
2. Press the power button to begin operation.
3. Press **SPEED** to change the purifier's speed. The default is medium. Use low speed for quiet mode or high speed for rooms with more people or higher levels of air pollution.
4. Press **TIMER** to activate timed operation from 1 to 8 hours.
5. Press **ANION** to activate the purifier's negative ion mode, releasing negatively-charged oxygen ions into the air to pull dust and fumes onto the surfaces of your room, where they can be easily dealt with as part of regular cleaning.
6. Press the power button again to turn it off.
7. If the purifier will remain unused for an extended period, unplug it.

Maintenance

- Replace the filters as needed. Turn off and disconnect the product from its power supply before checking or changing the filters.
- Clean the surface with a soft dry or damp cloth. Never use abrasive cleaning products.
- Clean the inlet and outlet vents using a soft brush.
