Assembly

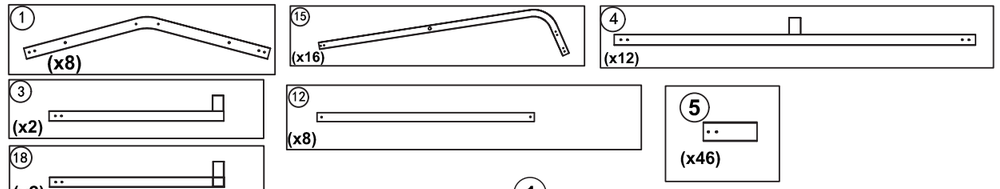

If you are fixing the carport on an uneven surface, it is crucial that the tiles are laid and secured in the correct direction, so that rainwater can flow from high to low. The correct direction will be influenced by the location where you are fixing it. If you are securing it on a flat ground, simply follow the assembly instructions.

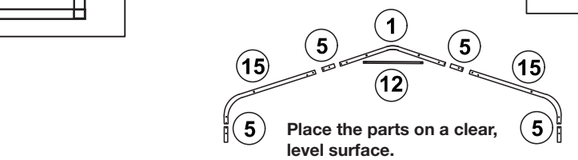

Low terrain **High altitude terrain**

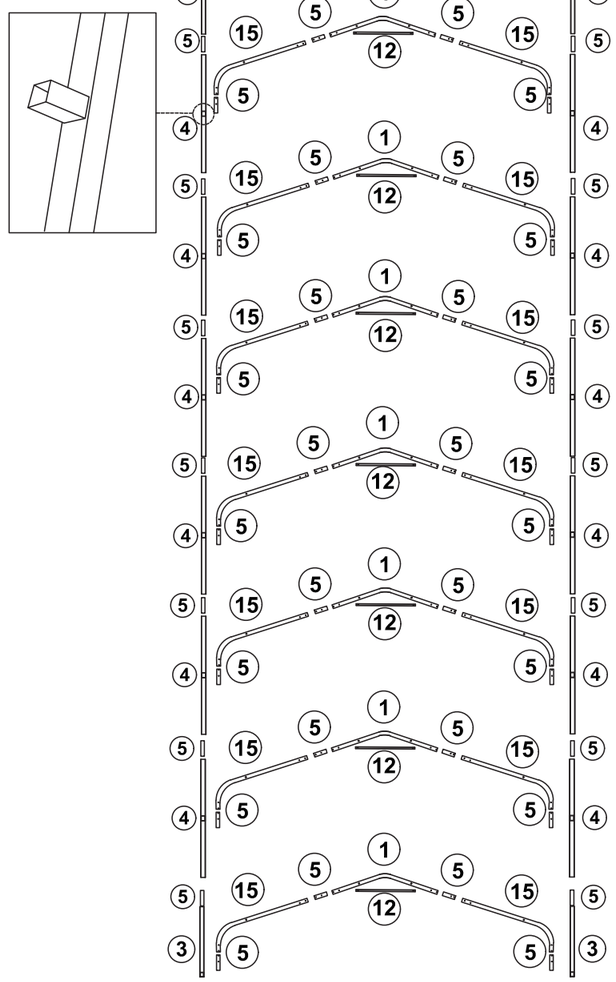

Assembly

1

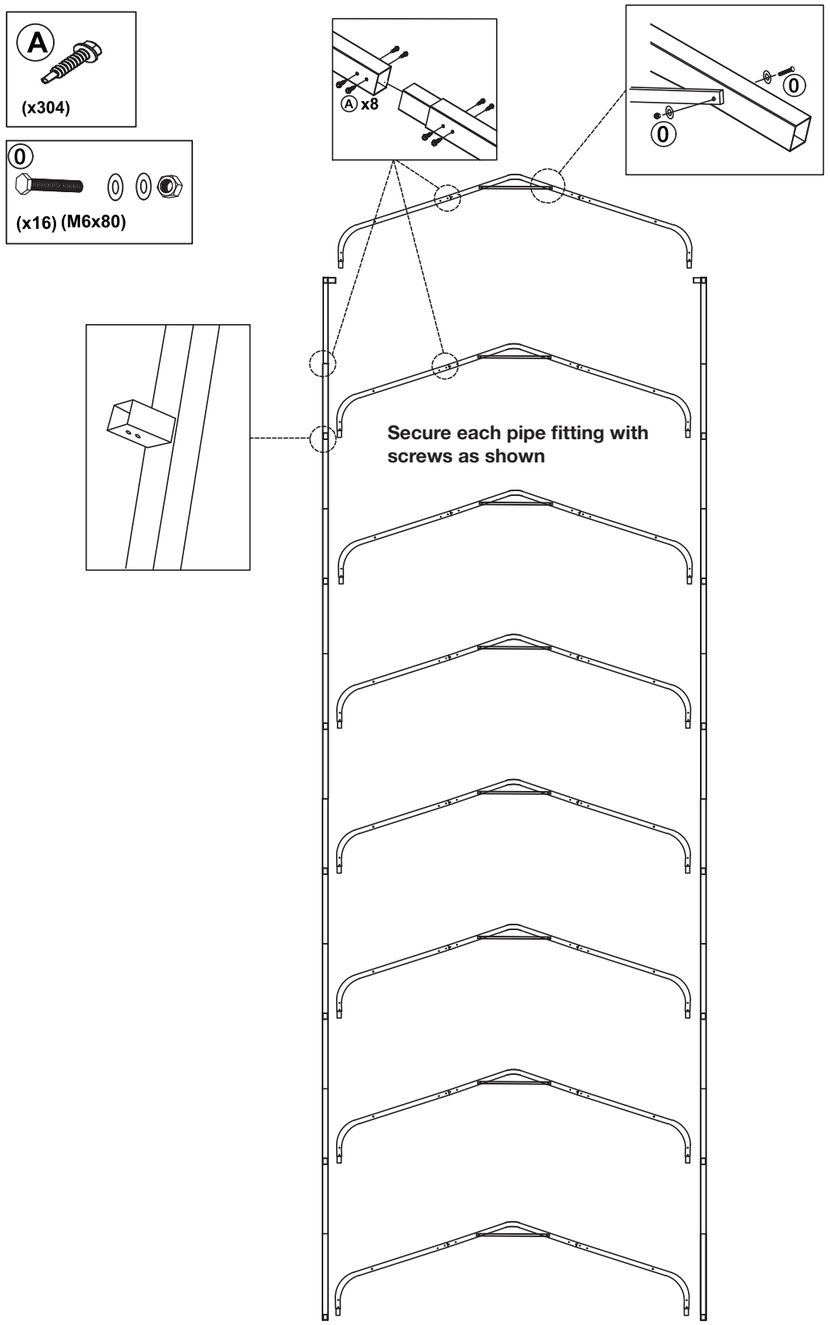

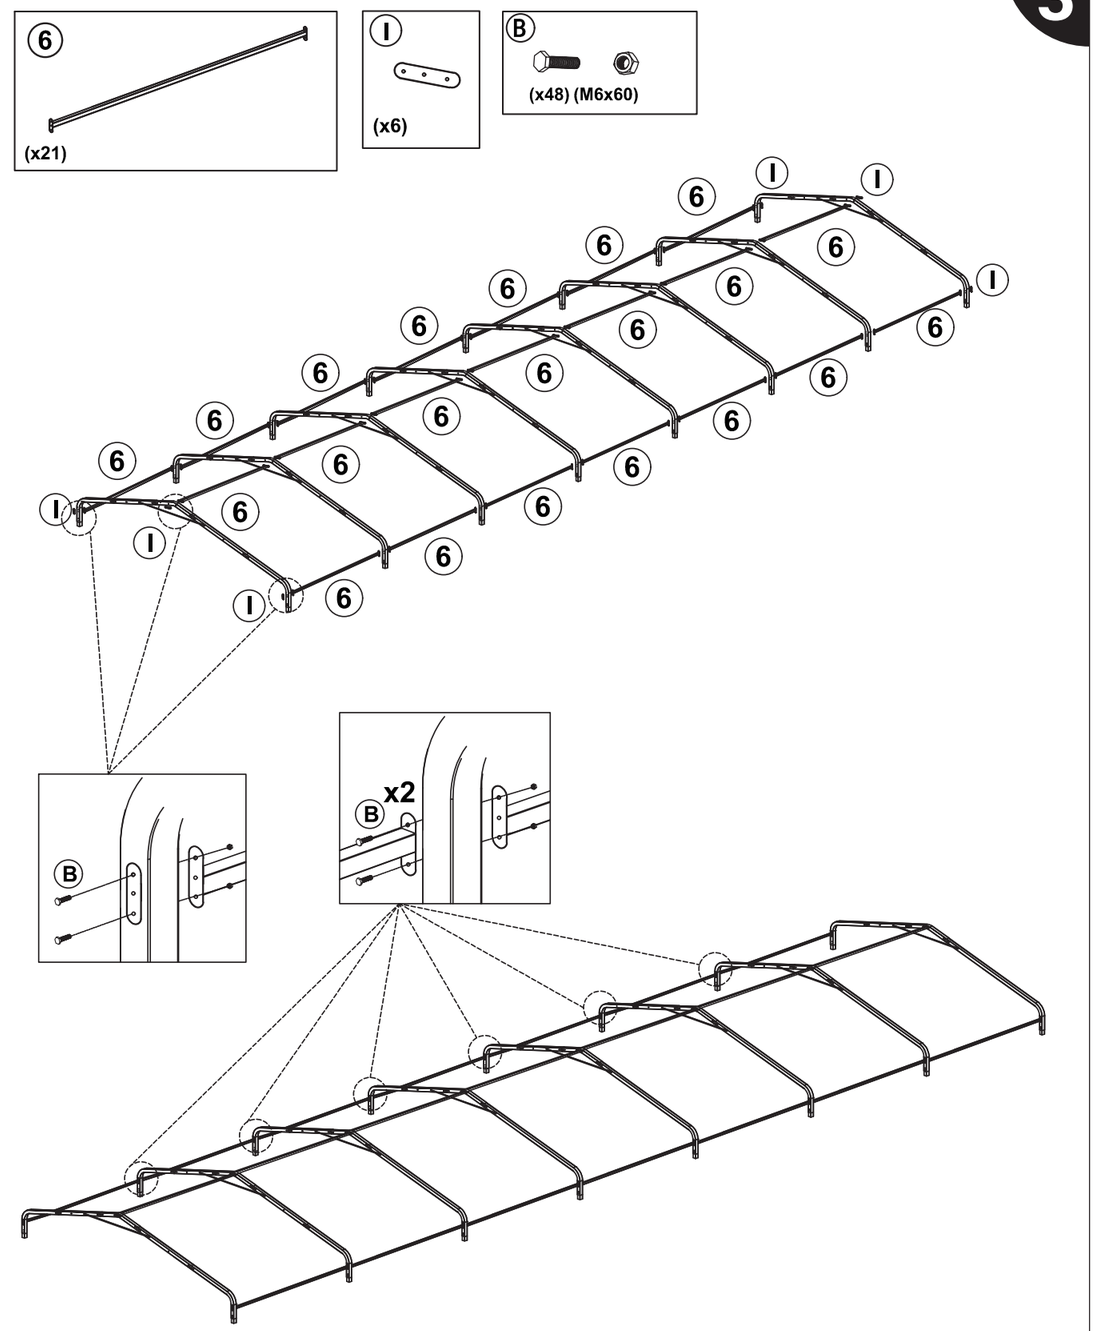

Place the parts on a clear, level surface.

4

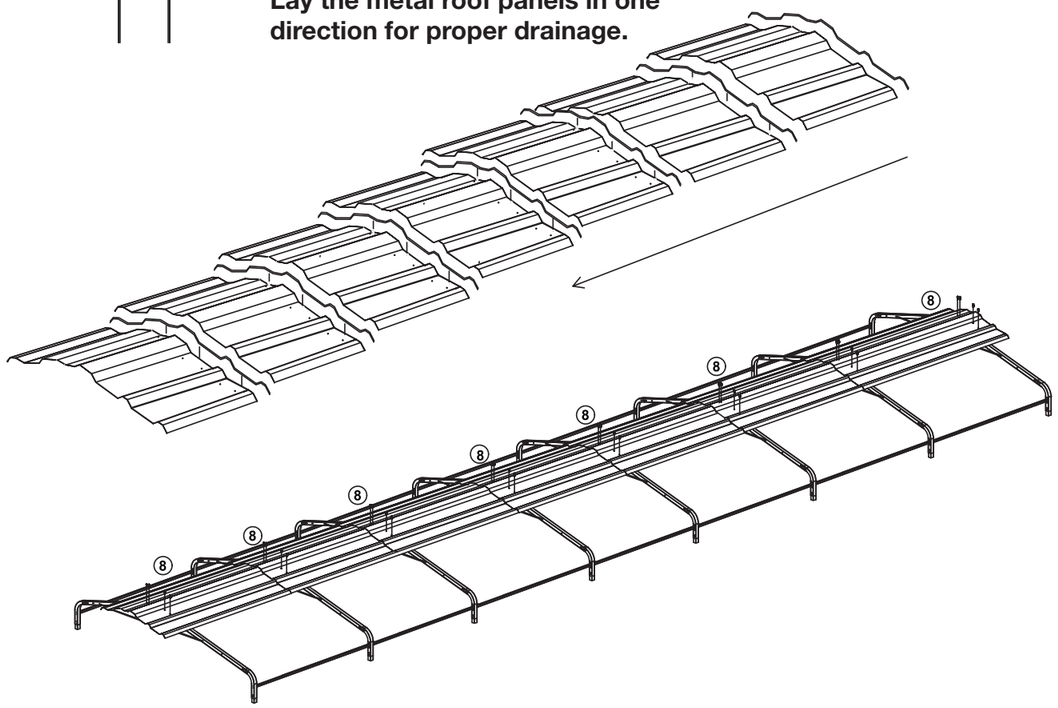

Press the weatherstrip onto the metal roof panels but do not cover the screw holes.

The first roof panel should extend 8cm beyond the frame.

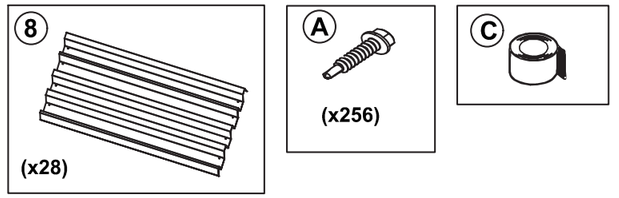

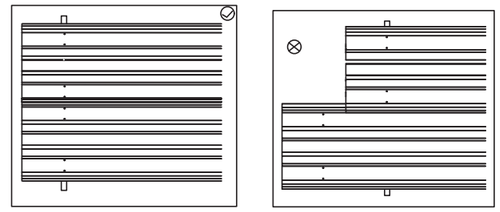

Lay the metal roof panels in one direction for proper drainage.

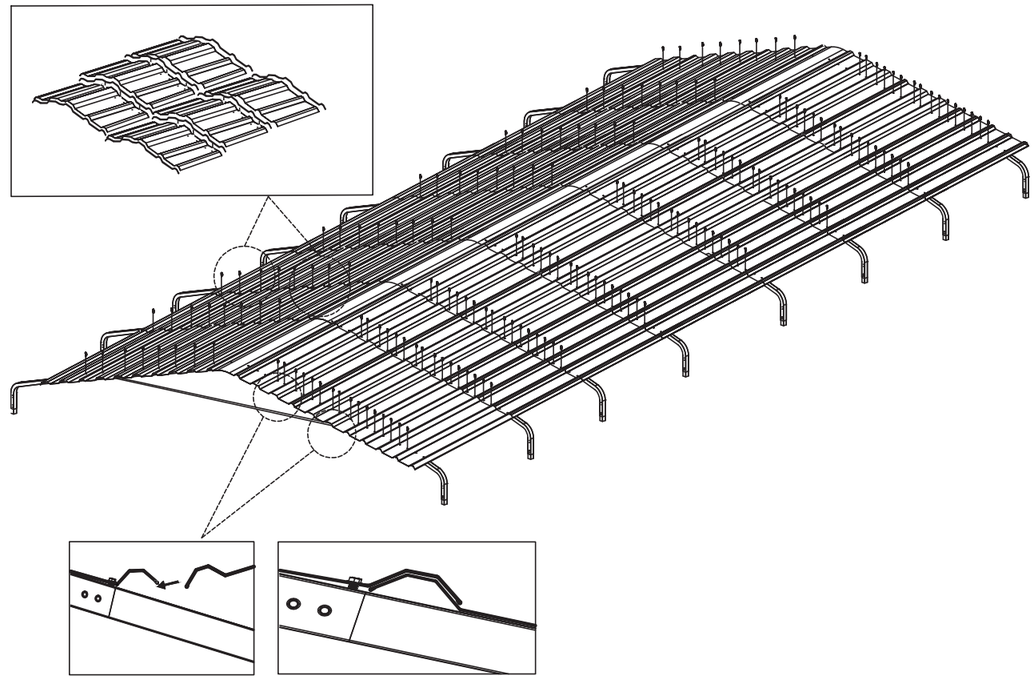

5

Each new panel should lap under the preceding panel to prevent water.

Secure the rear of the car shed using two steel wire ropes.

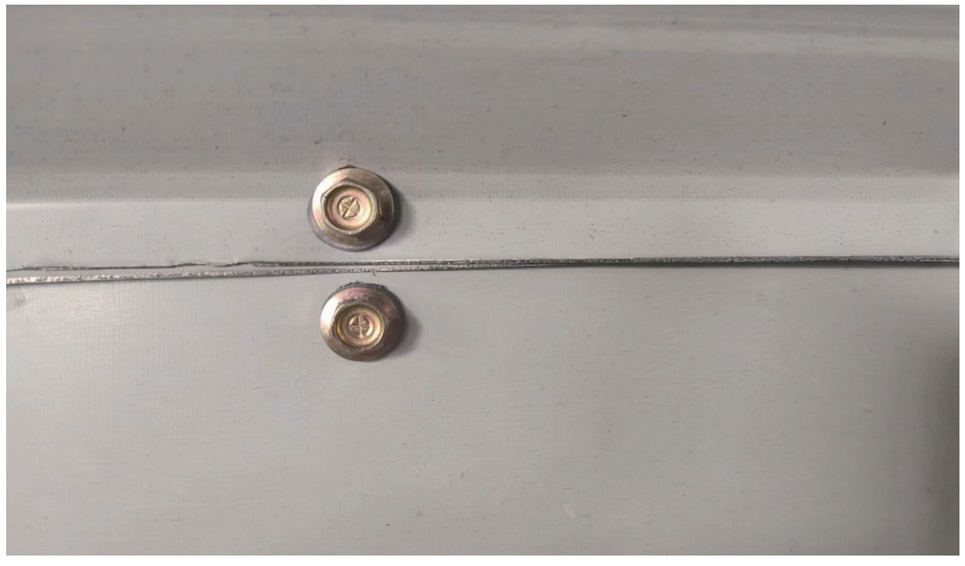

Assembly

The extra part of the model A screw is used for the situation shown in the circle above, and the customer decides whether to install it, if installed, as shown in the circle below.

Cleaning and Maintenance

- Clean the furniture with damp cloth, rinse thoroughly. Dry frame parts completely. Do not use bleach, acid or other solvents on the textile or metal parts.
- We recommend the use of furniture covers to protect the product when not in use.
- Inspect and tighten all screws on a regular basis to ensure proper performance and safety.
- In order to prolong the life and beauty of your product, we recommend storing it in a dry and protected area during off season periods.
