ENJOY SAUNA AT HOME

Something wonderful and healthy you can do for your body that requires no willpower. Just use the home sauna, and let the all-enveloping moist heat work its magic. Feel it ease tension, unlink tight muscles, soothe nerves, flush out your pores, and leave you relaxed and invigorated. The warm steam also stimulates circulation, helps ease muscular discomfort, flushes out toxins, makes your skin bloom, and can help relieve congestion when you're feeling under the weather. Best of all, this ingenious spa requires no plumbing, rewiring, or time-consuming maintenance. It sets up in minutes without tools. Simply pour in water, plug into a standard outlet, and in minutes you're basking in your own private negative ion home therapy.

Here's your private refuge from stress, busy schedules, the kids, and the cares of the day. Especially pleasurable after a workout or heavy exertion. Full disclosure: some willpower may be required in bringing your negative ion home therapy session to a close.

Can be used with beauty products such as bath lotion, figure-shaping salt, aroma essence, herbal products etc.

Thoughtful vent design leaves hands free for reading etc.

Sit down inside to rapidly clean out grease and dirt from your pores. Your skin will glow and look beautiful all the time.

Accelerates blood circulation. Remove fatigue, relieves stress and helps with figure shaping and fat reduction

Special waterproof cloth in the outer case retains heat, making it safe and convenient to use.

IMPORTANT SAFEGUARDS

ATTENTION :

When using an electrical appliance, basic precautions should always be followed, including

THE FOLLOWING :

Read all instructions before using this appliance.

DANGER :

To reduce the risk of electric shock:

Always unplug this appliance from the electrical outlet immediately after using and before cleaning.

WARNING :

To reduce the risk of burns, fire, electric shock, or injury to persons:

1. An appliance should never be left unattended when plugged in. Unplug from outlet when not in use, and before putting on or taking off parts.

ASSEMBLY SEQUENCE OF STEAM BOX

HALF BODY MD-101

A tube
6 pieces

H type pipe interface
2 pieces

B tube
4 pieces

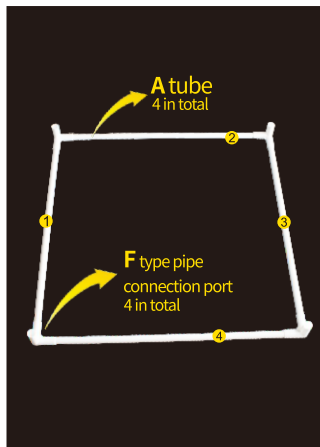

C tube 2 pieces
D tube 2 pieces
E tube 2 pieces

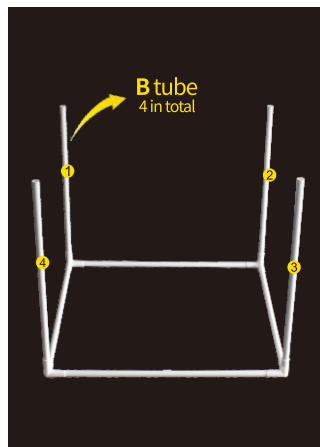

F type pipe interface
6 pieces

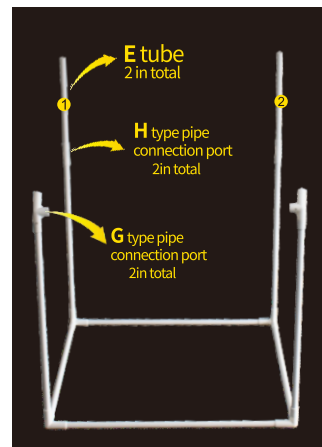

G type pipe interface
4 pieces

- ①. First connect the 4 A tubes and 4 F-shaped pipe connection ports as the picture shows

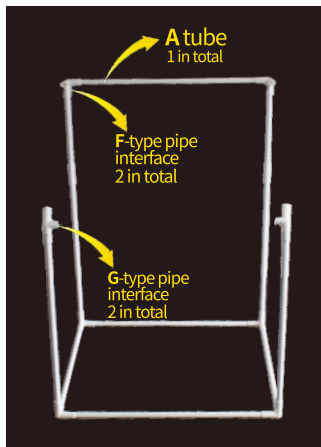

- ②. Insert 4 B tubes into F tubes connect the port, as shown in the figure picture above

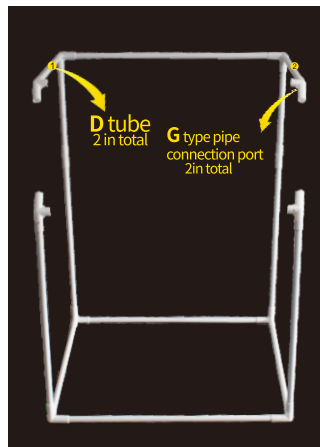

- ③. Insert 2 H-shaped pipe joints port and 2 H-shaped pipe connections the port on the B pipe, and then connect the 2 E pipes connect to the 2 H-shaped pipe connections, as shown in the figure above

ASSEMBLY SEQUENCE OF STEAM BOX

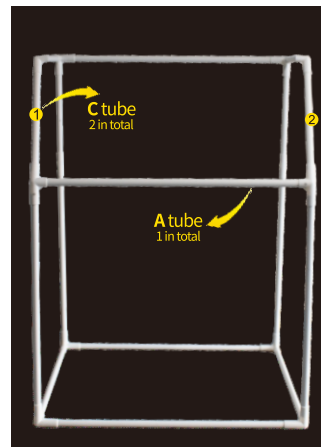

HALF BODY MD-101

- ①. Insert the two F-type pipe sockets into the E pipe, connect the A pipe with the two F-type pipe sockets, and then insert the two G-type pipe sockets into the B pipe as shown in the figure

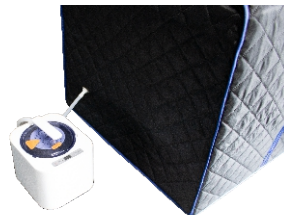

- ②. Then connect the 2 D tubes with the F tube sockets, and then connect the G tube sockets to the D tube, as shown in the figure

- ③. Finally, connect the two C-tubes with the G-tube sockets, and then connect the last A-tube with the remaining G-tube sockets. The frame installation is complete, as shown in the figure.

The inside of the jacket is connected to the pipe through the connection port, just connect it to the round box, as shown in the figure

The outside of the jacket is connected to the pipe through the connection port and the other end is connected to the steam meter as shown in the figure

MD-101 CONTROL PANEL INSTRUCTIONS

1. Add the appropriate amount of water and press ON/OFF
2. Press the Timer/Heating button to adjust the time and heat to an appropriate value
3. Time and heat can be adjusted at any time by +/- key
4. The maximum adjustable time is 60 minutes
5. The maximum temperature can be adjusted to nine gears
6. After the water boils, it can be adjusted to proper temperature

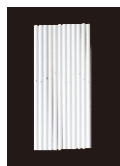

ASSEMBLY SEQUENCE OF STEAM BOX

WHOLE BODY MD-102

A tube
14 pieces

B tube
12 pieces

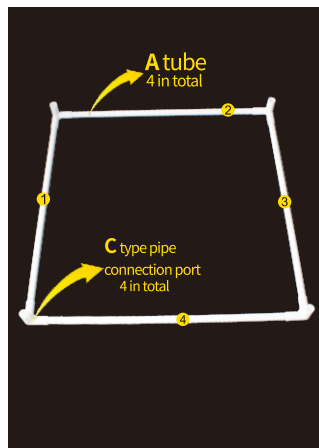

E type connecting pipe
4 pieces

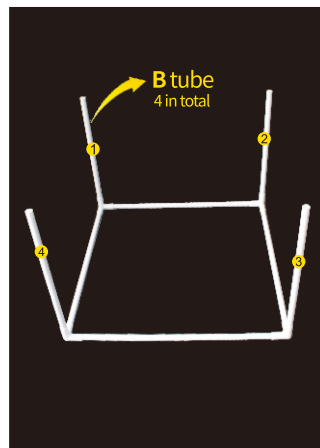

D type connecting pipe
4 pieces

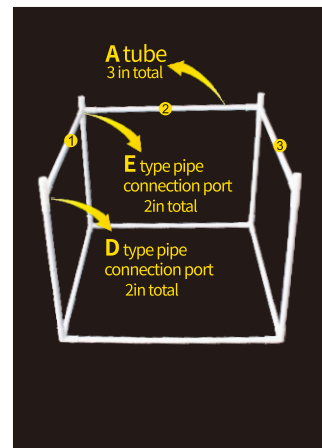

C type connecting pipe
8 pieces

①. First connect the four A pipes and the four C-shaped pipe connection ports as shown in the figure

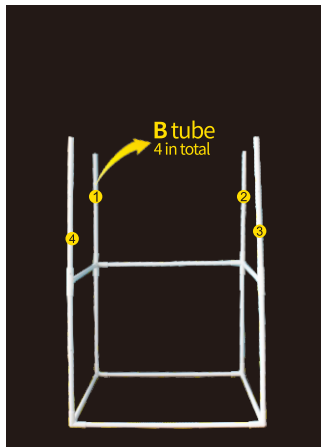

②. Insert 4 B-tubes into the C-tube connection port, as shown in the figure above

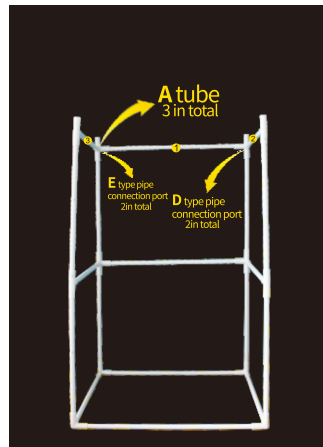

③. Insert the 2 E-shaped pipe connection ports and the 2 D-shaped pipe connection ports on the B pipe, and then connect the A pipe, as shown in the figure above

ASSEMBLY SEQUENCE OF STEAM BOX

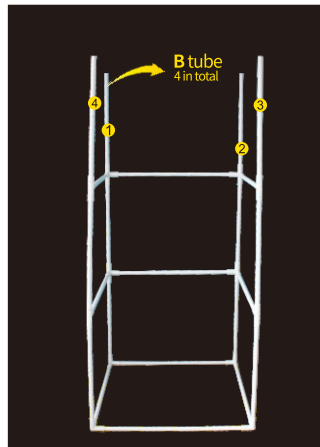

WHOLE BODY MD-102

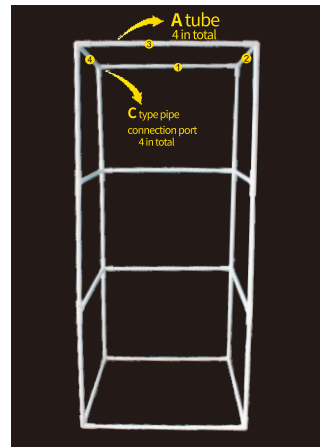

③ Then insert 4 B tubes into the connection port, as shown in the figure

④ Then, insert the 2 E-tube connectors and 2 D-tube connectors on the B tube and finally connect the 3 A tubes with the connectors, as shown in the figure

⑤ Then insert 4 B tubes on the 4 connection ports, as shown in the figure

⑥ Finally, connect the 4 C-shaped tube interfaces with the B tube, and then connect the 4 A-tubes with the C-shaped tube interface. The frame installation is completed, as shown in the figure.

Connect to the internal socket connected by hose, then connect to the round box

Connect to external socket via hose Ready to use when connected to the steam meter

MD-102 CONTROL PANEL INSTRUCTIONS

1. Add the appropriate amount of water and press ON/OFF
2. Rotate the lid to cover, screw the safety valve into the corresponding small hole, so that the lid will not be opened
3. Press the Timer/Heating button to adjust the time and heat to an appropriate value
4. Time and heat can be adjusted at any time by +/-key
5. The maximum adjustable time is 95 minutes
6. The maximum temperature can be adjusted to sixteen gears (1-16 gears are automatically adjusted)
7. After the water boils, it can be adjusted to proper temperature

ADDITIVE RAYIO

Please refer to additive ratio in the following table when additive is added to prevent burns ,trouble of line or the unit

Additive Types	Water Level	Amount of Additive	Harmful Effects by Excessive amount
Milk	Middle level (about 1300cc)	Not more than 80g	<ul style="list-style-type: none">● Burned black surface or bottom of the pot and damage to the function or leading to unsafety.● Bubble or liquid is overrunning, then cause burns or damage to the unit.● Be bad for health.● Too heavy smell.
Various herb bag	ditto	Not more than 50g	
Lotion for sauna	ditto	Not more than 5g	
Essential oil, perfume	ditto	Not more than 10g	
Salt, shaping salt	ditto	Not more than 30g	
Lemon, grape, pomelo	ditto	5-10 pieces	
Others	ditto	Proper amount	

Keep the water below MID when additive is put in.

Do not add alcoholic liquid and/or toxic material into the steamer pot.

To avoid excessive bubble or overrunning of liquid, add moderate additive.

Always remember to put herb in a cloth bag when herb is used instead of putting herb or herb powder directly into the pot.
