REPLY WITHIN 24 HOURS IN BUSINESS DAYS

Step 1

Insert side panels 1 into kick plates 2 and fix them with screws A

Ⓐ  × 4

The door shaft hole is in the front

Step 2

Connect back panel 3 with side panels
1 by screws A

(A)  × 6

Step 3

Install the waist face 15 on the side panels with screws A

Ⓐ  × 4

Ensure the left side holes of 15 are aligned with the holes of the left side panel, then fix them with screws A, so is the right side.

Step 4

Install the guide rail brackets 16 on both side panels with screws A, then install the guide rails H

Attention: the direction!

Insert the back of rail to the hole of the back panel, then align the front hook of another side (the slider can be pull out) to the rectangle hole of bracket 16, press down and insert into the hole.

Step 5

Install waist panel 14 on cabinet with screws A  × 2

Step 6

Fold drawer bucket 18

Insert the small parts on drawer bucket 18 into drawer front panel 17 and fold the small parts

Step 7

Insert the small parts on drawer back panel into the holes on both sides of drawer side panels and fold the small parts

Step 8

Install the assembled drawer in the cabinet

Fix the doornob E on the drawer with screws G

(E)  × 1

(G)  × 2

There are 2 ways to install the drawer.

Option 1: First, completely pull out the slide rails of the left and right side panels, and place the drawer above the inner side of the slide rails. Make sure that the hanging holes in the front on both sides of the drawer are aligned with the hooks of the slide rails, connect them first, then press down the end holes to make the hooks fully enter the hanging holes.

Option 2: Completely pull out the slide rail, find the small black part on the front rail, put it upward or downward to divide the rail to 2 parts. Attach the front part on the drawer side panel, so as the another side. Then align the rails on the side panels A and drawer sides and push it. Pull out the drawer twice slowly and the lubricating oil inside the slide rails will come out and the drawer will work.

Step 9

Connect top panel 5 with back panel and side panels by screws A

(A)  × 6

Step 10

Install the shelf clasps D and put the shelves 6 on them

Install 2 magnets J on the top and bottom as shown below

(D)  × 12

(J)  × 2

Step 11

Insert the door pivot K into the hole of the bottom corner (shims L can be used to adjust), then insert the door into the door pivot on the bottom and adjust the spring shaft on the top. Install the doorknob E on the door with screws F.

(K)		× 1
(L)		× 2
(F)		× 2
(E)		× 1

Step 12

Fold all the small parts on dome panel 8 towards the middle for 90 degree

Insert dome panel 8 into dome back tube 9 and dome front tube 7

Step 13

Fix the dome panels and tubes with 4 screws
A and screws N in the middle and ends

(A)  × 8

Fix the dome back panel 10 with 4 screws A

(N)  × 4

Step 14

Fix the dome on the top of the cabinet with screws A and N, then adjust the feet of the cabinet as your needs

(A)  × 2

(N)  × 4

Step 15

Fix the cabinet to the wall with screws
I to prevent tipping
