WarmlyYours

Product Description

Available in several different models, heated towel bath racks from WarmlyYours provide a sleek yet functional design, perfect for a variety of home decor styles. These models are able to provide such a high level of performance at such a low cost (often just 15 cents per day) because of the internal heating elements which turn the bars into sources of radiant heat for warming towels and bathrobes. And not only do these electric models warm your bath towels, they can actually dry them in-between uses.

Hardwired or Plug-in Towel Warmers

Choosing the right electrical connection for you is a crucial step in identifying the perfect towel warmer. WarmlyYours offers both hardwired (meaning the electrical connection is made at a junction-box inside the wall) and plug-in models (with 3-prong plug). We have 4 models with a hardwired and 3 with plug-in connections, and each type of connection has unique benefits.

Hardwired	Plug-in
Provides a visually streamlined look without cords or wires.	Very DIY-friendly for installation.
	Can be unplugged when not in use.

Easy to Install

Whether you choose hardwired or plug-in, installation is a breeze.

Heats Quickly and Evenly

Quick warm up time with evenly distributed heat for optimal warmth.

All towel warmers hold a cULus Listing. UL File number E312202
