

**1-2. Thread the wires through the holes in the disc. After the wires are threaded, adjust the height, and then thread the wires through the "8" buckle (as shown in the figure, anti slip wire effect)**

**3. Lock the wire head on the disc with plastic screws.**

**4. Fix the suspension plate to the junction box with screws.**

**5. Use terminal caps to connect and tighten the main line on the ceiling to the light body wires, and connect and tighten the ground wire to the ground wire: the white wire is the zero wire (N), the black wire is the live wire (L), and the bare copper wire is the ground wire (E).**

**6-7. Cover the disc on the ceiling hanging plate and fix it with screws on the hanging plate.**

**8-9. Place the glass cover on the lamp holder and tighten it with a nut sleeve to secure the glass cover to the lamp cup.**

**10. Screw the bulb into the lamp holder. (excluding light bulbs)**

Attention:

1. Please cut off the power supply before installation to prevent electric shock (installation by certified electrician is recommended)
2. Due to the different display, the actual color can be different from the image
3. Due to the manual measurement of lamp body size, there may be a deviation of 1 / 2 inch
4. If you have any questions or lost parts, please feel free to contact us and we will try our best to help you
