

Installation Manual

Accessory List:

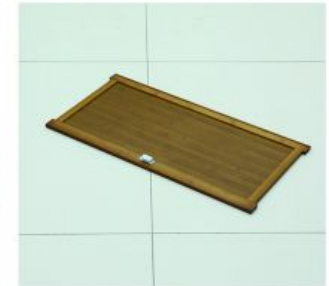

Door suction installation

1. Take out the bottom layer board and install the door stopper on the front with small screws.

2. Take out the top layer board and install the door stopper on the back with small screws.

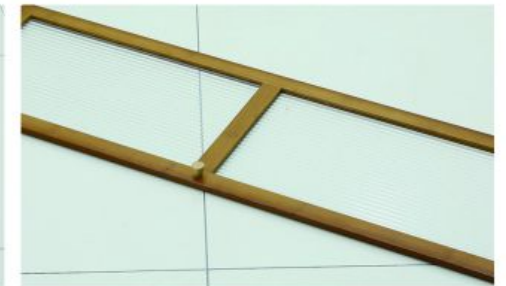

3. Take out the large layer board with grooves and install the door stopper on the front with small screws.

Installation of door panels

1. Remove the door panel and install the door pad with small screws.

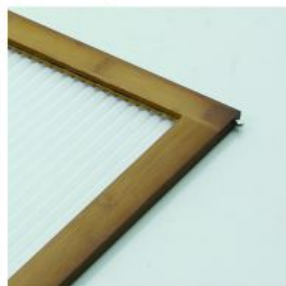

2. Remove the door handle and install it with a middle screw.

Installation of small door panels

1. Remove the small door panel, door handle, and door mat and install them with medium screws.

2. Take out the metal strip and insert it into both ends of the small door panel.

Installation steps:

1. Remove the bottom layer plate and side brackets that have installed the door stopper and install them with long screws on the left and right sides.

2. Remove the middle bracket and install it with long screws.

3. Remove the cabinet foot and install them with long screws.

4. Erect the bracket, take out the small layer board, and install it with long screws.

5. Take out the metal strip and insert it into the middle bracket hole.

6. Remove the large layer board and install it with long screws.

7. Take out the small backboard and insert it along the groove.

8. Take out the installed door panel and clip the metal strip on the door panel into the bracket groove.

9. Take out the slotted large layer board with the door stopper and install it with long screws.

10. Similarly, continue to install the remaining small door panels.

11. Take out the large backboard and insert it along the groove.

12. Remove the top layer board and install it with long screws.

13. Remove the door panel and install it with door bolts.

14. Tighten the top layer plate screws.

15. Remove the rear bumper and install it with long screws.
