

Assembly Instructions for **Model 21596048**

Installation Steps

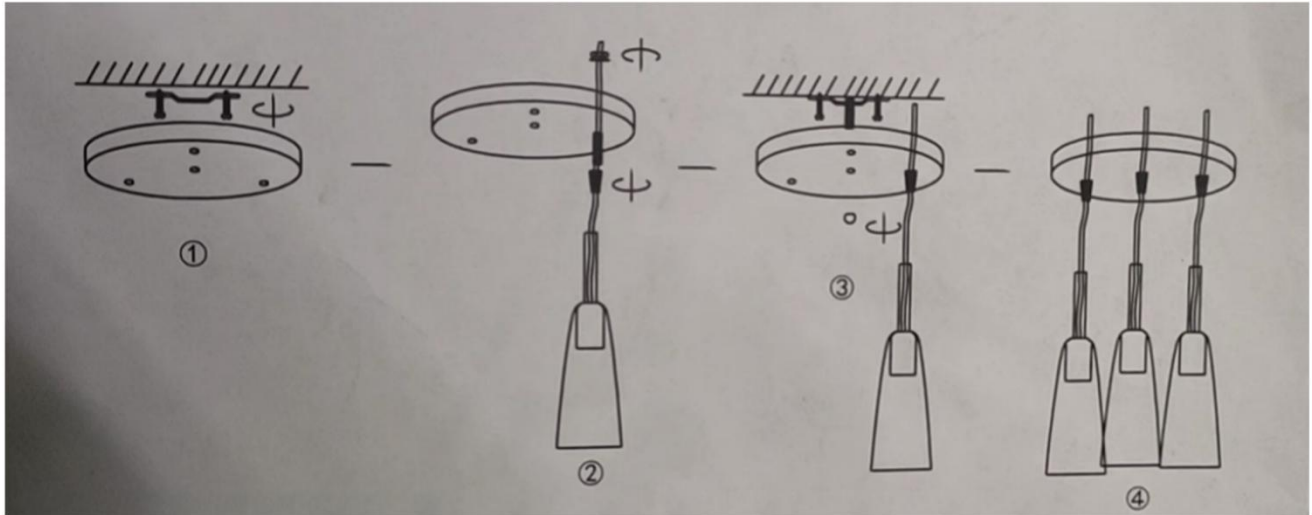

Note: The product styles are slightly different, but the installation principles are the same.

1. Lamp installation

1. Insert the full-tooth tube into the power cord of the lamp body and screw in the wick
2. Insert the lampshade through the power cord of the lamp body and insert it into the wick
3. Insert the inner-tooth washer along the ladder power cord and lock it with a hexagonal nut
4. Insert the long wooden tube
5. Insert the long round table rubber particles and long four legs (for adjusting the hanging height of the lamp)

2. Round tray installation

1. Use the iron hanging plate to mark the location of the hole on the cement ceiling, then drill the hole and knock the plastic plug into the hole in the ceiling

2. Put the self-tapping screw on the iron hanging plate, and screw the self-tapping screw through the hole of the iron hanging plate clockwise into the plastic plug to lock the iron hanging plate

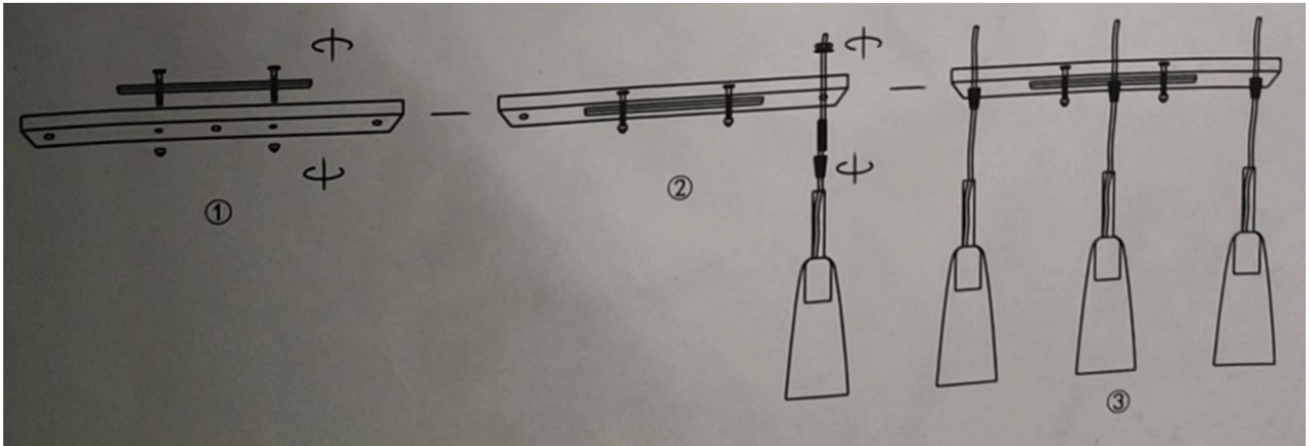

3. Insert the lamp part completed in step 1, screw the short four-tooth part and the short round table above the disc to fix the hanging height

4. The iron hanging plate passes through the middle hole of the disc and tightens the spherical internal thread part to fix the disc

5. Connect the blue wires of each lamp and connect the neutral wire; connect the red wires of each lamp and connect the live wire, install the bulb, and it's done

Warm Tips: If your ceiling is not a cement board, but a wooden ceiling, please fix the hanging plate directly with self-tapping screws

3. Rectangular tray installation

1. Use the iron hanging plate to mark the location of the hole on the cement ceiling, then drill the hole and knock the plastic plug into the hole in the ceiling
2. Put the self-tapping screw on the iron hanging plate, and screw the self-tapping screw through the hole of the iron hanging plate clockwise into the plastic plug to lock the iron hanging plate
3. Insert the lamp part completed in step 1, screw the short four-tooth part and the short round table above the rectangular plate to fix the hanging height
4. The iron hanging plate passes through the two small holes in the middle of the rectangular plate and tightens with the spherical internal thread part to fix the rectangular plate
5. Connect the blue wires of each lamp and connect the neutral wire; connect the red wires of each lamp and connect the live wire, install the bulb, and complete

Your fixture is now assembled and ready to use.
