Geometric Progression 4

D1214S24267-2262

Geometric Motion IV is part of a series of eight geometric drawings that invite the viewer to experience the elegance of minimalist design. These understated compositions showcase line drawing techniques that explore a variety of geometric shapes that highlight the fundamental importance of the line in art.

Geometric Motion 4 is an understated quadrilateral drawing that reminds one of a child's kite. The subtle gradation of line weight serves to highlight the work's unique, simple proportions. The series is reminiscent of Josef Alber's geometric line drawings of the 1950s. Part of ART by TA, Geometric Motion 4 is an exclusive and original work of art.
