(G) - Bumpons
x8

assembly instructions

Friendly Tip: Take a deep breath going in. This may be a tricky part, but nothing too overwhelming. Just follow these steps to the T and the outcome will be worth it!

- ⓘ While assembling the product, tighten the bolts up to 50%. Once all parts are in place, only then fully tighten the bolts.

step 1:

Start by placing one of the frames (A) on a flat surface. Taking the image below as a reference, align rods (B) over the slots given on leg (A).

Note:

Ensure that the rods are placed in such a way that the holes are facing downwards, aligning with the lower part of the tenon on the lower frame.

⚠ While assembling the product, tighten the bolts up to 50%.
Once all parts are in place, only then fully tighten the bolts.

step 2:

Fix the rods (B) to the frame (A) by inserting bolts (E) into the given holes and tighten them using allen key (F).

step 3:

Now, place the other frame (A) over the other side of the rods as shown in the image.

step 4:

Repeat step 2 to fix the other side of the rods (B) to the frame (A).

step 5:

Simple enough? Now, carefully lift the assembled table frame and place it upright. Ensure all parts are securely fastened before standing it up.

step 6:

Then, take the bump-ons (G) and fix them over the joints of the frame where the glass (C & D) will be placed. Take the image below as a reference to mark the points.

step 7:

When done, place the glass (D) over the bump-ons placed on the lower shelf of the table.

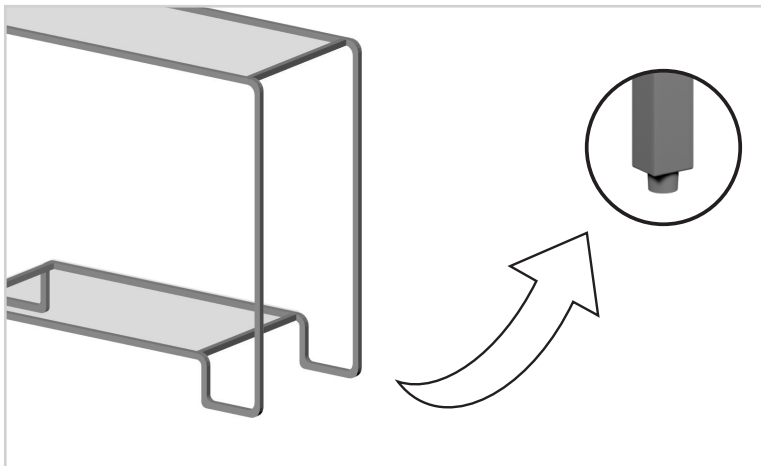

step 8:

Similarly, place the glass (C) over the bump-ons placed on the top of the table.

step 9:

Place a spirit level on top of the surface to check alignment. Adjust the levellers if needed.

Voila! Your table is now assembled and secure!
