Metal File 			

SAFETY INFORMATION

CAUTION

Please carefully read the following important safety information before handling or installing this shower. There is a risk of serious injury while handling this product.

To minimize these risks, please note:

- Always wear safety glasses and gloves while handling.
- Always follow the installation instructions.
- Inspect glass for damage before installation.
- Extreme caution should be taken while handling the glass during installation as the tempered glass may shatter if in contact with a hard surface.
- Do not cut or modify the tempered glass as it will shatter if cut.
- Carefully remove product from packaging and keep packaging until installation is complete.
- Inspect all parts for damage or missing; if there is damage or part missing to the unit prior to installation, please contact customer service at the number provided in this guide.
- Cover the drain with tape to prevent the loss of small parts.
- The shower base and finished walls should be installed before beginning the shower door installation.
- During the installation, protect the shower floor with a drop cloth to avoid damage.
- This product should be installed by two people who are familiar with construction requirements. Professional installation is recommended!
- Keep this installation manual for future reference.

NOTE: Two people should perform this installaton.

Model Dimensions

configuration dimensions:

A Product Height	B Model width	C Installation width	D(Opening)
72"	24"	24"~26"	19-7/8"
	30"	30"~32"	25-7/8"
	32"	32"~34"	27-7/8"
	34"	34"~36"	29-7/8"
	36"	36"~38"	31-7/8"

NOTE

This model is reversible for right or left-hand door installation. The left-hand door installation is shown throughout this manual. For the right-hand door installation, simply begin on the opposite wall and reverse the orientation of the installation steps shown.

1 Determine your step in from the edge of tray and plumb your **Wall Jamb(A)**.

NOTE

1. Determine your starting point from the edge of tray (3/8" (10mm) is recommended) and mark the position as Fig.a .
2. Plumb your **Wall Jamb(A)** on each side and then mark screw holes position as Fig.b .

Fig.a

Fig.b

Inside

Note: mark as the outline of profile hole

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

2 Install **Wall Anchor(aa)**

NOTE

1. Drill holes with $\phi 6\text{mm}(1/4")$ drill bit as Fig.a .
2. Insert **Wall Anchors(aa)** as Fig.b .

NOTE

- If a Stud is present behind the wall:
drill $\phi 1/8"$ (3mm) pilot holes into the stud and use the ST4.0x35mm **Screws(bb)**
OR
- If NO Stud is present behind the wall:
drill $\phi 1/4"$ (6mm) holes and insert the **Wall Anchors(aa)** and use the ST4.0x35mm **Screws(bb)**.

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

3 Install Wall Jamb(A)

NOTE

1. Fix **Wall Jambs(A)** with **Screw(bb)** as Fig.a .

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

4 Install Top Pivot Sleeve(F) and Bottom Pivot Sleeve(E).

NOTE

- 1.Install the **Top Pivot Sleeve(F)** into the **Glass Door(C)** and secure it with **screws(ee)** as Fig.a .
- 2.Install the **Bottom Pivot Sleeve(E)** into the **Glass Door(C)** and secure it with **screws(ee)** as Fig.b .

Note: ensure bracket without 'V' is always on the top

Note: ensure bracket with the 'V' is always on the bottom

CAUTION: Do not put glass directly on the ground

5 Install Upright Profile(B)

NOTE

- 1.Remove the upper and lower brackets as Fig.a and Fig.d
- 2.The Bracket notch is always facing inward as Fig.b and Fig.e .
- 3.Fix the **Upright Profile(B)** and the **Glass Door (C)** with a Bracket as Fig.c and Fig.f

CAUTION: Do not put glass directly on the ground

6 Install Glass Door (C)

NOTE

- 1.Insert the **Glass Door(C)** to the **Wall Jamb(A)**, the max adjustment is 7/8"(22mm) as Fig.a and Fig.b
- 2.Note the Bracket orientation as Fig.c

NOTE

The Plastic spacer is an aid tool to prevent the glass from touching the ground

7 Determine your step in from the edge of tray and plumb your **Wall Jamb(G)**.

NOTE

1. Rotate the **Glass Door (C)** inward to facilitate the installation of **Wall Jamb(G)**
2. Determine your starting point from the edge of tray (5/8" (16mm) is recommended) and mark the position as Fig.a.
3. Plumb your **Wall Jambs(G)** on each side and then mark screw holes position as Fig.b.

Fig.a

Fig.b

Inside

Note: mark as the outline of profile hole

8 Install **Wall Anchor(aa)**

NOTE

1. Drill holes with $\phi 6\text{mm}(1/4")$ drill bit as Fig.a .
2. Insert **Wall Anchors(aa)** as Fig.b .

NOTE

- If a Stud is present behind the wall:
drill $\phi 1/8"$ (3mm) pilot holes into the stud and use the ST4.0x35mm **Screws(bb)**
OR
- If NO Stud is present behind the wall:
drill $\phi 1/4"$ (6mm) holes and insert the **Wall Anchors(aa)**
and use the ST4.0x35mm **Screws(bb)**.

9 Install Wall Jamb(G)

NOTE

1. Fix **Wall Jambs(G)** with **Screw(bb)** as Fig.a .

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

10 Install **Alu. Extrusionw/magnet strip(H)**

NOTE

1.Insert the **Alu. Extrusionw/magnet strip(H)** to the **Wall Jamb(G)**, the max adjustment is 1-1/8"(28mm) as Fig.a and Fig.b

11 Install Magnetic Strip(I)

NOTE

1. Install the **Magnetic Stripe (I)** into the **Glass Door (C)** as Fig.a.

12 Adjustment

NOTE 1.Adjust the **Glass Door (C)** and the **Alu. Extrusionw/magnet strip (H)** left and right to ensure that the **magnetic stripe (I)** and the **Alu. Extrusionw/magnet strip(H)** are seamless as Fig.a and Fig.b.

13 Lock **Alu.Extrusionw/magnet strip(H)**

NOTE

1. Drill 3 holes on the inside of the **Wall Jamb(G)** with 1/8"(3mm) drill bit as Fig.a .
2. Install **Screws(ff)** and screw cover cap **Washers(cc)** as Fig.b.
3. Install **Screw caps(dd)** as Fig.c.

14 Lock Upright Profile(B)

NOTE

1. Drill 3 holes on the inside of the **Wall Jamb(A)** with 1/8"(3mm) drill bit as Fig.a .
2. Install **Screws(ff)** and screw cover cap **Washers(cc)** as Fig.b.
3. Install **Screw caps(dd)** as Fig.c.

15 Install the **Handle(J)**

NOTE

1. Install the **Handle (J)** on the **Glass Door (C)** as Fig.a.

Fig.a

16 Install the **Bottom Anti-Water Strip(K)**

NOTE 1.Install the **Bottom Anti-Water Strip (K)** on the **Glass Door (C)** as Fig.a、 Fig.b and Fig.c .

The **Bottom Anti-Water Strip (K)** needs to be inserted to the end

17 Install the **Alu. Threshold(D)** and **Connector(L&M)**

NOTE

1. Apply glass glue to the bottom of the **Alu. Threshold(N)** to prevent water seepage as Fig.a
2. Install the **Alu. Threshold(N)** and **Connector(L&M)** as Fig.b

18 SEALING

NOTE The surfaces need to be clean and free of debris before applying silicone.

NOTE Make sure that the Shower door closes tightly and opens smoothly. Apply a good quality silicone sealant along the **Wall Jamb(A&G)** and **Alu. Threshold(N)**.

! Allow 24 hours for the silicone to cure before using the shower.

! Apply Silicone Sealant,(not supplied).

The shower room needs to be sealed inside and out
