The back panel is based on the actual purchase style!

### Assembly Flow Chart

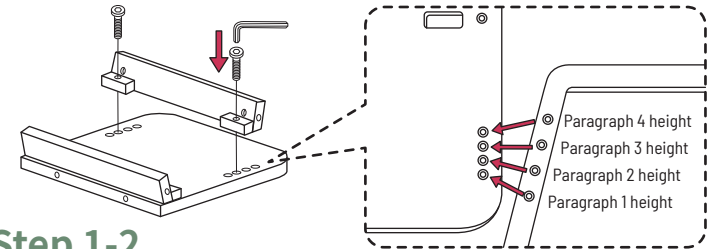

The height of the chair surface of the toddler growth chair

4-stage adjustment: 19/22/25/29cm

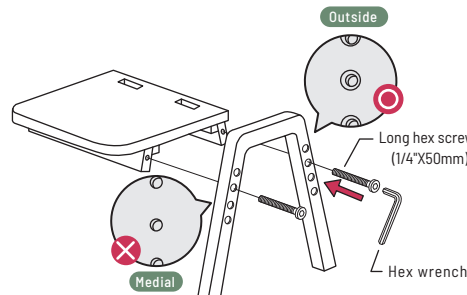

### Step 1-1

With the seat hole facing up, put the crossbar and lock the hexagon screws (1/4"X25mm)

### Step 1-2

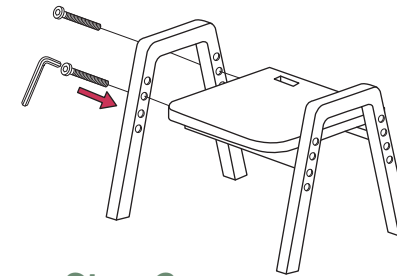

The height adjustment needs to be matched with the seat legs in the adjustment holes under the seat board

### Step 2

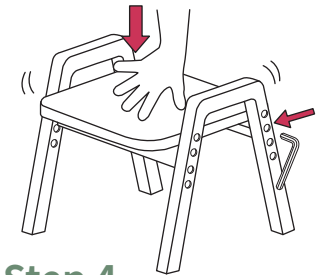

Take out the seat plate and install the chair legs, do not lock, the large hole side is facing outward, and lock the hexagon screws (1/4"X50mm)

Note: The large hole (counterbore) must be facing outward, and the hexagonal screw is locked from the outside, and it is flat with the board after locking

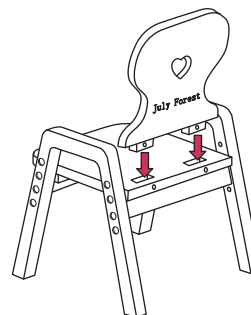

### Step 3

Attach another leg without locking

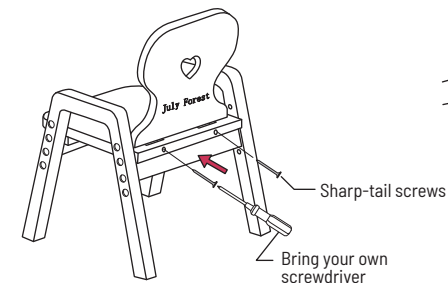

### Step 4

After pressing the seat surface, press to adjust the balance and lock the seat legs

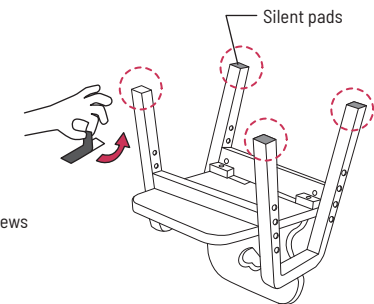

### Step 5

Insert the back of the chair into a tight fit, noting that the logo is on the outside

### Step 6

Use a screwdriver to firmly lock the sharp-tail screw (50mm) on the backrest of the chair  
※ The screw is about 0.5 cm deep (more than half the length of the short side of the hexagonal wrench)

### Step 7

Silent pads can be pasted upon request
