

The TraceFit™ System by Traceable Designer®

Powered by the patented Slide-and-Trace™ method

Custom Valance Design, Guided from Start to Finish

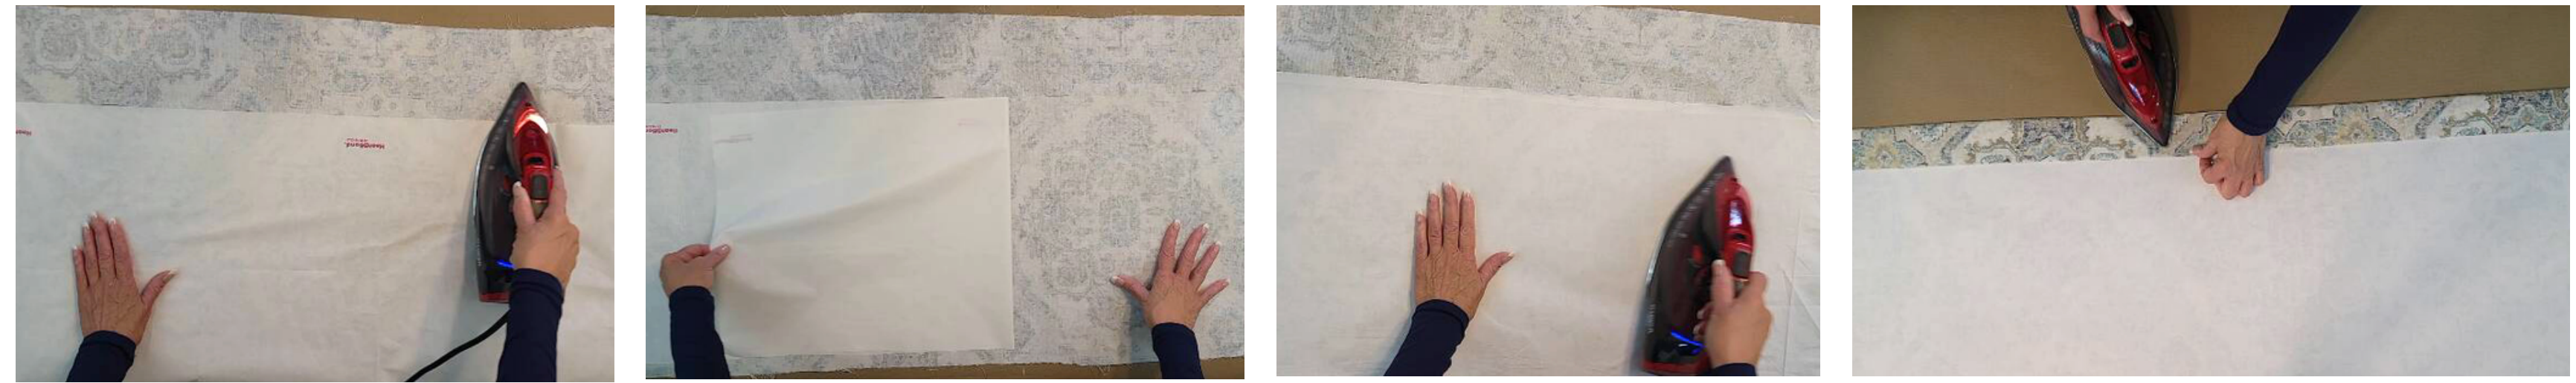

Start with Fabric Confidence

Signature Design Companion Cards give you guidance for fabric selection, motif placement, trim choices, and shopping terminology – so you can choose with confidence from the beginning.

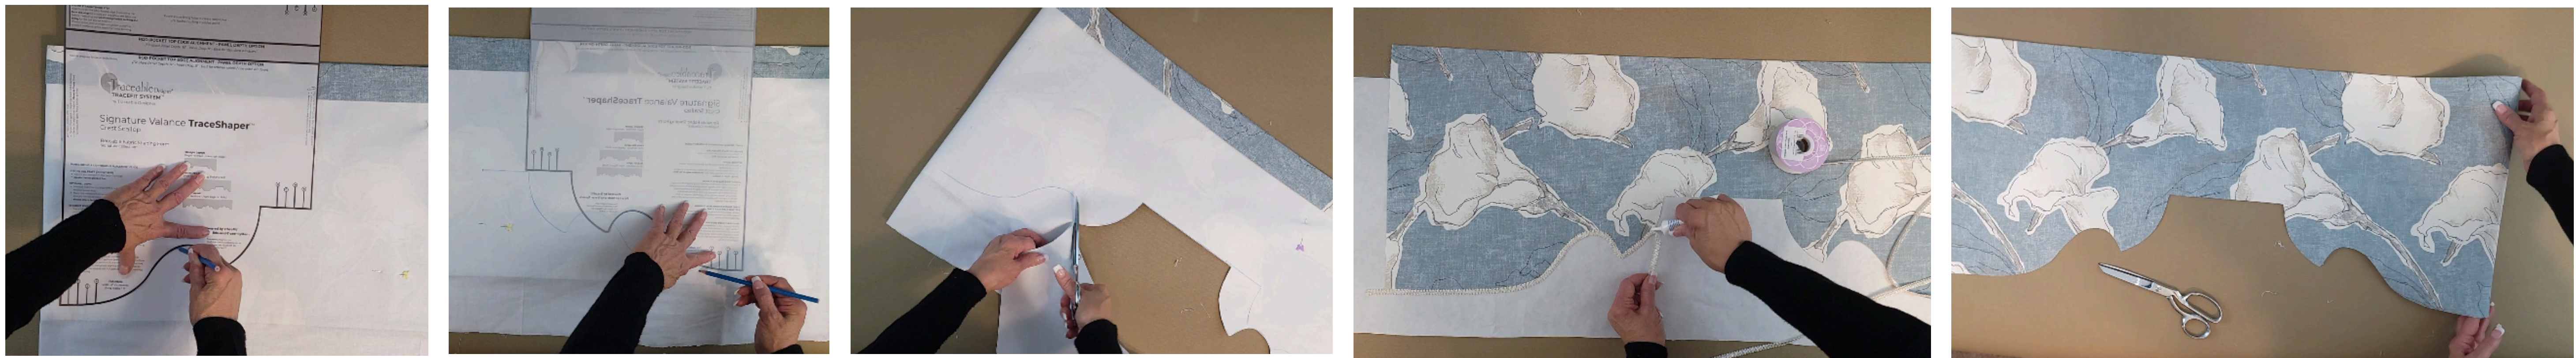

Add Structure to Your Fabric

Fuse the included backing to your fabric, then add lining to create a crisp panel ready to shape.

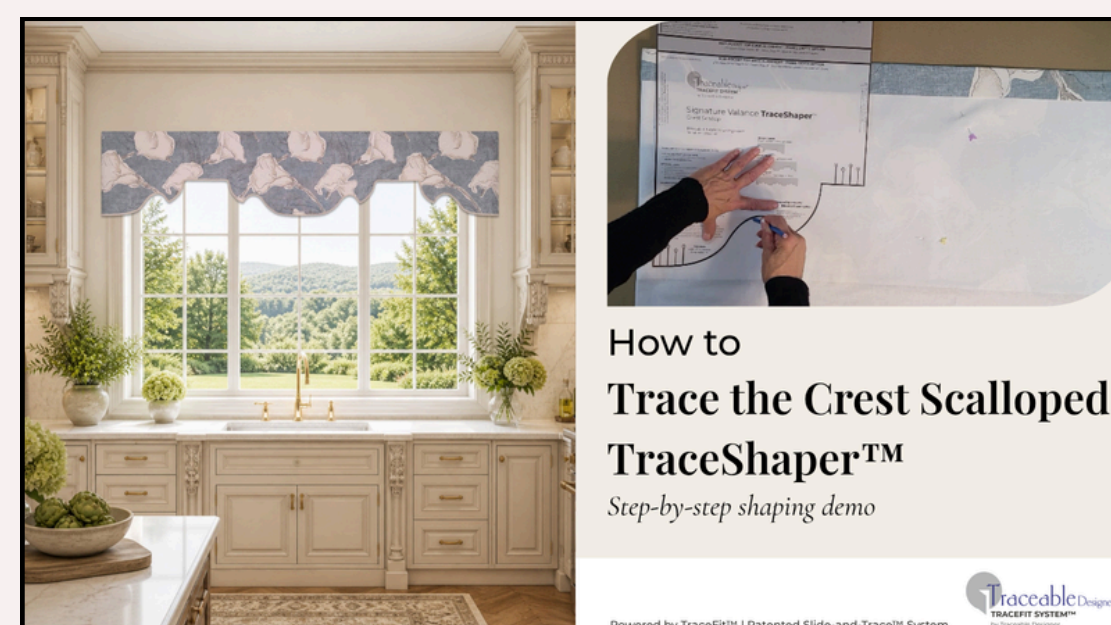

Slide. Trace. Cut. Hang.

The patented Slide-and-Trace™ method makes custom fitting remarkably direct. Your Crest Scalloped TraceShaper™ guides your fabric into a custom-fitted architectural valance with clean, polished structure.

Video Support Included

Step-by-Step YouTube guidance helps you move confidently from selection and fabric prep, to shaping, finishing and hanging.

Easy Hanging

Hang the finished valance using the built-in rod pocket and a standard curtain rod.

A Note from the Designer

I created TraceFit™ to make true custom window design achievable from home without sewing, pattern reading, or design experience. Everything from professionally guided fabric selection to final hanging is supported through printed guidance, step-by-step videos, and designer-level project support.

– Linda Schurr, Founder & Designer
