

INSTRUCTIONS

- Make sure the switch is ON before using, or the solar pathway lights won't light or charge.
- Please remove the transparent protective film on the solar panel, this will allow the solar panel to receive more sunlight.
- As the charging effect of the solar panel is depended on the sunlight, the lighting time is affected by weather, seasons, places, etc.
- Fully charged the solar panel under sunlight for 10 hours at the first time use.
- Please keep the panel clean and put it directly in the sun to get enough solar energy to charge
- Be sure the solar fixture is in a relatively sunny location.

KEEP THESE INSTRUCTIONS

- Do not dispose of the product and batteries in fire. When the product or batteries are disposed of in fire, the heat build-up may cause explosion
- If the ground is too hard, do not insert it into the ground forcibly, please try to soften the ground with water and use shovel to avoid the stake breaking
- Don't put the solar lights under other lights or the solar lights might not light up
- Do not soak the solar lights in water
