

# HRTX20SSADA

4" x 19.88" x 12.63" (H x W x D)

20 inch wide ADA compliant under cabinet retractable range hood for ductless use in stainless steel, made in the USA with separate wall switch for ADA applications

## Highlights:

- Designed and manufactured in the USA
- Low profile 4" height for easy integration in your kitchen
- Engineered specifically for recirculating (ductless) ventilation

## Product Features:

|                                                             |                                                                                                                                             |
|-------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| 20" Wide ADA Compliant Retractable Recirculating Range Hood | Slim-fitting low profile range designed for installation in compliance with the ADA guidelines                                              |
| Premium style for luxury kitchens                           | Retractable filter blends in seamlessly with cabinetry when not in use for an elevated kitchen look                                         |
| Low profile 4" height                                       | One of the slimmest under-cabinet hoods in the market, creating a minimalist look that takes up less vertical space than the competition    |
| Designed for ductless operation                             | The industry's first range hood specifically made for efficient filtration in recirculating applications with no access to exterior ducting |
| Made in the USA                                             | Designed and manufactured by Summit in the USA, complete with American steel for lasting durability                                         |
| ADA compliant design                                        | Hood is wired to run off a wall switch for improved accessibility, with a remote terminal block included                                    |
| Improved filtration with smoother airflow                   | Unique cross-flow fan moves up to 40% more air through the filters than standard hoods converted to recirculating mode                      |
| Angled airflow keeps smoke away from user                   | Vents are set at a slight upwards angle, ensuring smoke and odors won't be directed towards the home cook                                   |

Quality construction for long-lasting use

Metal ball-bearing glides, innovative cross-flow fan, and steel materials to ensure efficient use for years of reliable ventilation
